

Polo Saddle

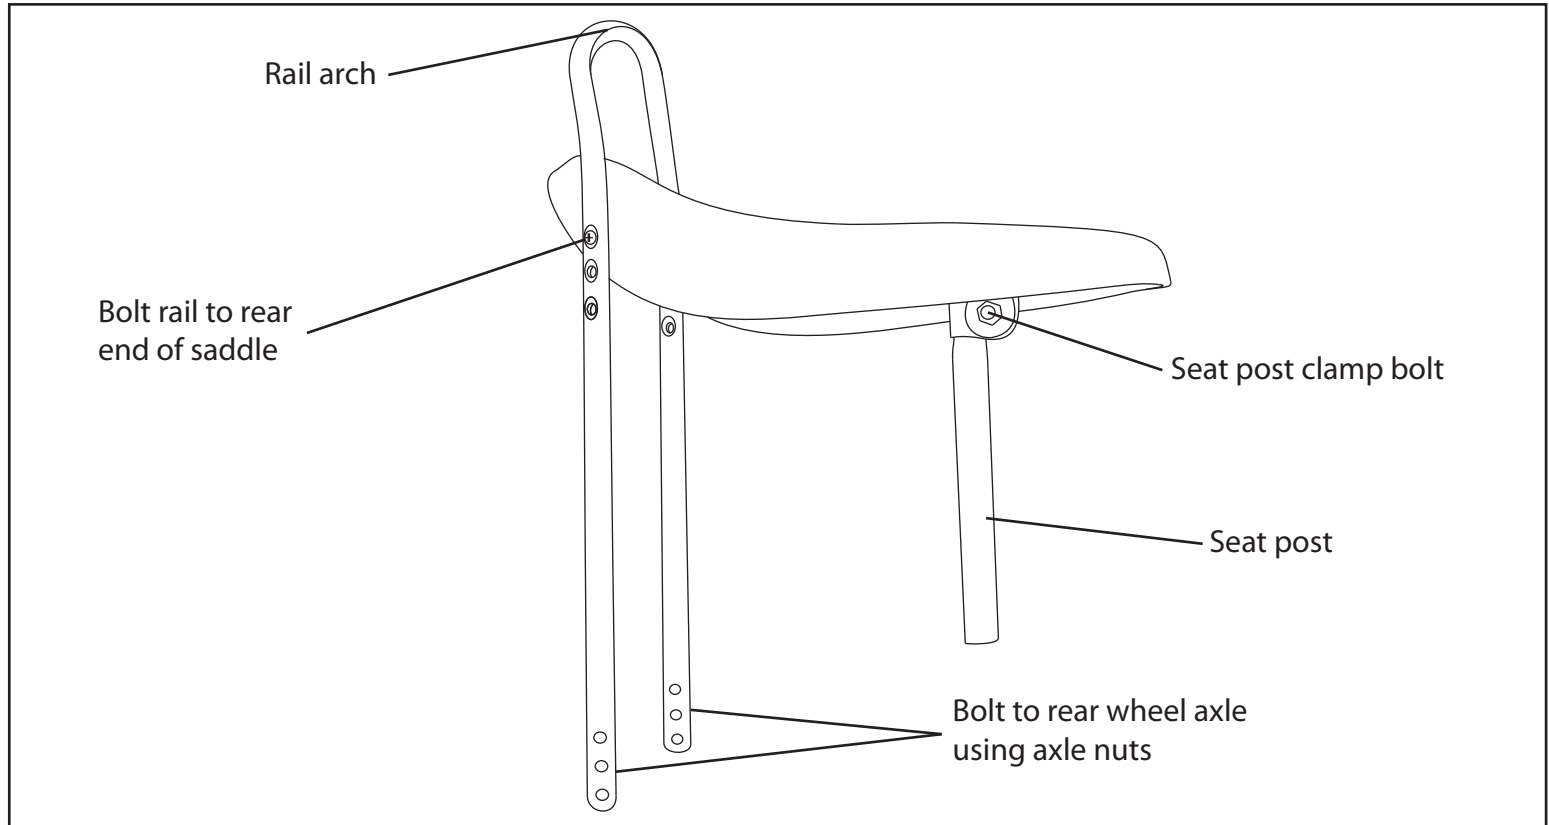

Instruction Manual

SA015

Please read all instructions before installing and using your polo saddle.

Warning

Failure to install saddle properly could lead to serious injury or death.

Installation/Use

Installing the Polo Saddle.

1. Your polo saddle comes with a seat post clamp attached. You will need to use a seat post with no clamp.
2. Insert the seat post and tighten down the seat post clamp bolts.
3. Using the seat post only, mount the saddle to the bike and adjust to the desired angle and height.

* It is not safe to ride the bike without installing a polo seat rail. Do not ride the bike at this time.

Installing the Polo Seat Rail.

1. There are three holes at the bottom and about halfway up on each leg of the rail. The bottom holes go over the rear wheel axle. The top holes are bolted to the back of the saddle itself.
2. Attach the seat rail to the saddle so that the arch (top) leans away from the rider, towards the back of the bike.
3. Bolt the bottom of the seat rail to the axle using the wheel's axle nuts.

* Be sure to tighten all bolts completely before riding.
