

EZ-3 USX mid model pivot change COMPATIBILITY WARNING

rev. 12/11/2008

The original Bronze colored EZ-3 USX was equipped with 30mm O.D. frame pivot bearings and used 10mm frame pivot bolts.

The next generation Black/Silver colored EZ-3 USX was originally equipped with 30mm O.D. frame pivot bearings and used 10mm I.D. frame pivot bolts. Then there was a running change to 32mm O.D. with 12mm I.D. bolts. **When replacing a Black/Silver front or right rear frame you must check the size of what you have in order to get the correct replacement!**

The current Silver EZ-3 USX HD uses 32mm O.D. bearings and 12mm I.D. bolts.

Right Rear
