

Training Wheels

Instruction Manual TW-001

Please read all instructions before installing and using your new training wheels.

Warning

Failure to install training wheels properly may result in serious injury/death and or damage to your bicycle.

Installation/Use

1. Remove axle nuts and washers from rear wheel.
2. Using an adjustable wrench, install the training wheel support arm as shown in image.
3. Install training wheel to the lower support using provided hardware.
4. Check alignment and stability, double check axle nuts are firmly seated.
